

Tan Bali Pebble

01 > pebble series

bali pebble

In response to the demand from professional landscapers, Island Stone has produced the **Bali Pebble** tile. This tile offers an affordable way to introduce the pebble look for areas such as paths, driveways, claddings and courtyards and is also suitable for indoor use.

The **Bali Pebble** tile has a more variable colour and flatness profile, creating a look that is more random than the Perfect Pebble tile.

Use the Perfect Pebble in feature locations and the more economical **Bali Pebble** in those less critical areas.
