

Step 1 Immediately after grouting, remove excess grout from surface with coarse, damp tiler sponge using diagonal strokes.

Step 4 (NEXT DAY!) Scrub surface of glass tile with soap and water to initially remove dry excess grout.

Step 2 Continue with the same process using a damp sponge to remove additional grout on surface.

Step 5 Spray or brush on a light solution of Sulfamic Acid. Wait 5 minutes before softly scrubbing with scouring sponge.

Step 3 Remove smudges with careful sponging where required.

Step 6 Wash down tile surface with clean water and sponge. Repeat Sulfamic Acid wash (Step 5) if necessary.
