**Step 1** Immediately after grouting, remove excess grout from surface with coarse, damp tiler's sponge using diagonal strokes.

**Step 2** Continue with the same process using a damp sponge to remove additional grout on surface.

**Step 3** Remove smudges with careful sponging where required.

**Step 4** (NEXT DAY!) Scrub surface of glass tile with soap and water to initially remove dry excess grout.

**Step 5** Spray or brush on a light solution of Sulfamic Acid. Wait 5 minutes before softly scrubbing with scouring sponge.

**Step 6** Wash down tile surface with clean water and sponge. Repeat Sulfamic Acid wash (Step 5) if necessary.
